

What Would Be Better Than Winning the Lottery?

Did you hear about the \$1.6 Billion dollar Powerball lottery a couple of weeks ago won by three people? They each get \$528.8 million dollars! I am sure none of you bought a card for that lottery. Yet who of us has not thought about what it would be like to win the lottery?

There was a lot of talk around my house/office...ok more like daydreaming about what it would be like if someone won \$1.6 billion. Some dreamed of boats or cars or trips across the world. In our culture where there is a lot of focus on material things, it's easy to get caught up in the Powerball frenzy. It's fun to dream. But you were never going to win- not that jackpot. There's a greater chance of you getting elected president without running, getting struck by lightning multiple times, being eaten by a shark, and my favorite- there's a greater chance of you getting pregnant with quadruplets WITHOUT fertility drugs! **The odds for winning that \$1.6 billion lottery were 1 in 292.2 million!**

If you play don't be surprised or disappointed when you don't win. On the other hand, there is something you can contribute to that is guaranteed to win. You know what it is right? This church. When you give here, you win - people around you win, history wins & the future wins. There's nothing you can give that has a guaranteed return investment like investing in what God is doing. So right now, we're going to give you that opportunity. Think about your gift as the against all odds guaranteed winning ticket.
